Built-in wireless LAN facility make possible to connect Wi-Fi spot to control display screen using Smart phone free application of "MIRROR CONTROL" or captaincloud.com.

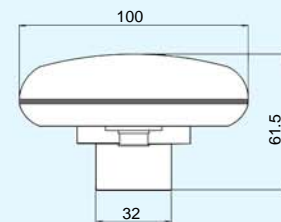

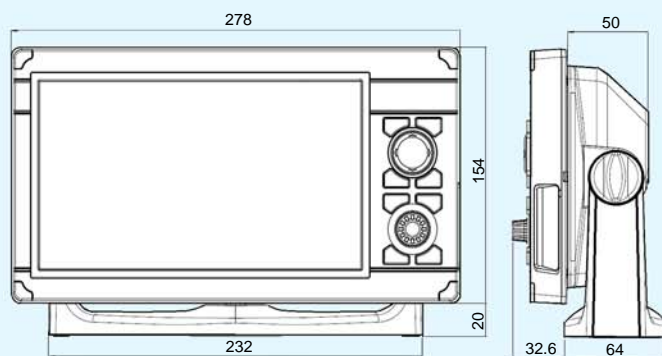

Card slot is used for C-MAP MAX and 4D Cartography micro SD card or user micro SD card

Specifications:

- Display:** 9" day-light viewing color LCD (1100 nits)
Display resolution: 800 x 600 pixel (SVGA)
GPS Receiver & Ant.: 72 CH GPS/GLONASS receiver with embedded antenna
Fix accuracy & update: 2m CEP, 10Hz update rate
Touch-screen: Capacitive type, multi-touch available for Map zoom function
Chart format: C-MAP cartography compatible, MAX and 4D micro SD card
Micro SD card type: SDHC 3.0, maximum capacity 32 GB (FAT32) for user micro SD card
Waypoint & Route: 1,000 routes each having 50 Waypoints
Track point: 30,000 points
Event mark: 30,000 points
Data Interface: NMEA2000x1, NMEA0183x2, External GPS antenna 6 pins port
Transducer Type: 300W~1kW CHIRP transducer Low/Middle/High Frequency type and standard 600W/1kW
CHIRP Transducer List: AIRMAR B75L, B75M, B150M, B75H, P58, P66, P79, B45, B117, P319, B744V, B258, B260, CM260, B175L, SS175L, SS75L, SS75M, B785M, B175M, B285M, M135M, P75M, P95M, SS175M, TM185M, B175H, SS175H, SS75H, B175HW, M285HW, SS175HW, 185HW
Wireless LAN: Built-in Wi-Fi link is available to connect network for smart phone mirror control or remote Monitor Display
Waterproof: IPX6
Power requirement: 10-35 V DC, 25W
Weight: 3.3 kg with mounting bracket
Operating Temperature: -10°C~ +60°C
Storage temperature: -20°C~ +80°C

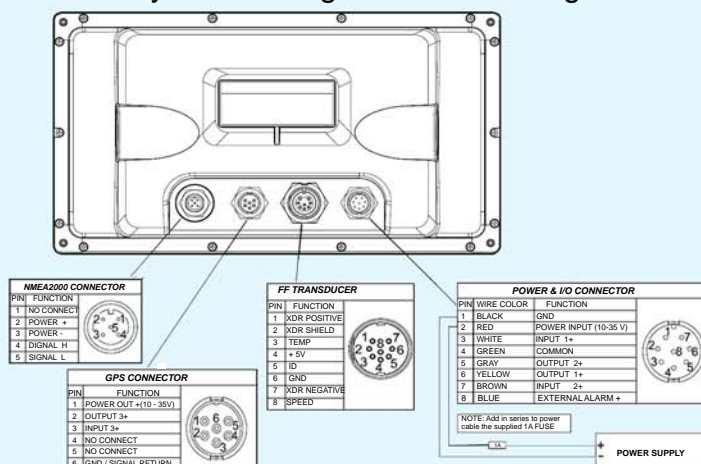

Note: Specifications are subject to change without notice or obligation.

Dimensions (mm)

1"-14 Threads for Marine Antenna pole

System Configurations & Wiring

Standard Equipment

- (1 pc. Each, except as specified)
- V-90PMAX Main Unit
- Power & IO cable
- Mounting Bracket with 2 pcs. knob
- Panel mount template

- Optional equipment
- GNSS/SBAS smart antenna(CSG-M8) with 15m cable

- Optional Transducers
- CHIRP Transducer 600W L/M/H
- 1kW L/M/H
